

Hale'iwa Mobility Hub Feasibility Study

The O'ahu Metropolitan Planning Organization, the City and County of Honolulu, and SSFM International (project team) are studying the feasibility of developing a mobility hub in Hale'iwa Town to provide improved transit and multimodal transportation options for the North Shore community.

What are mobility hubs?

Mobility hubs are places where transportation mode choices are linked, making it easy to transfer from one form of travel, such as walking, rolling, or biking, to another, like taking the bus or a shuttle. Hubs are often centrally located and intended to bridge transportation gaps, while reflecting the surrounding community.

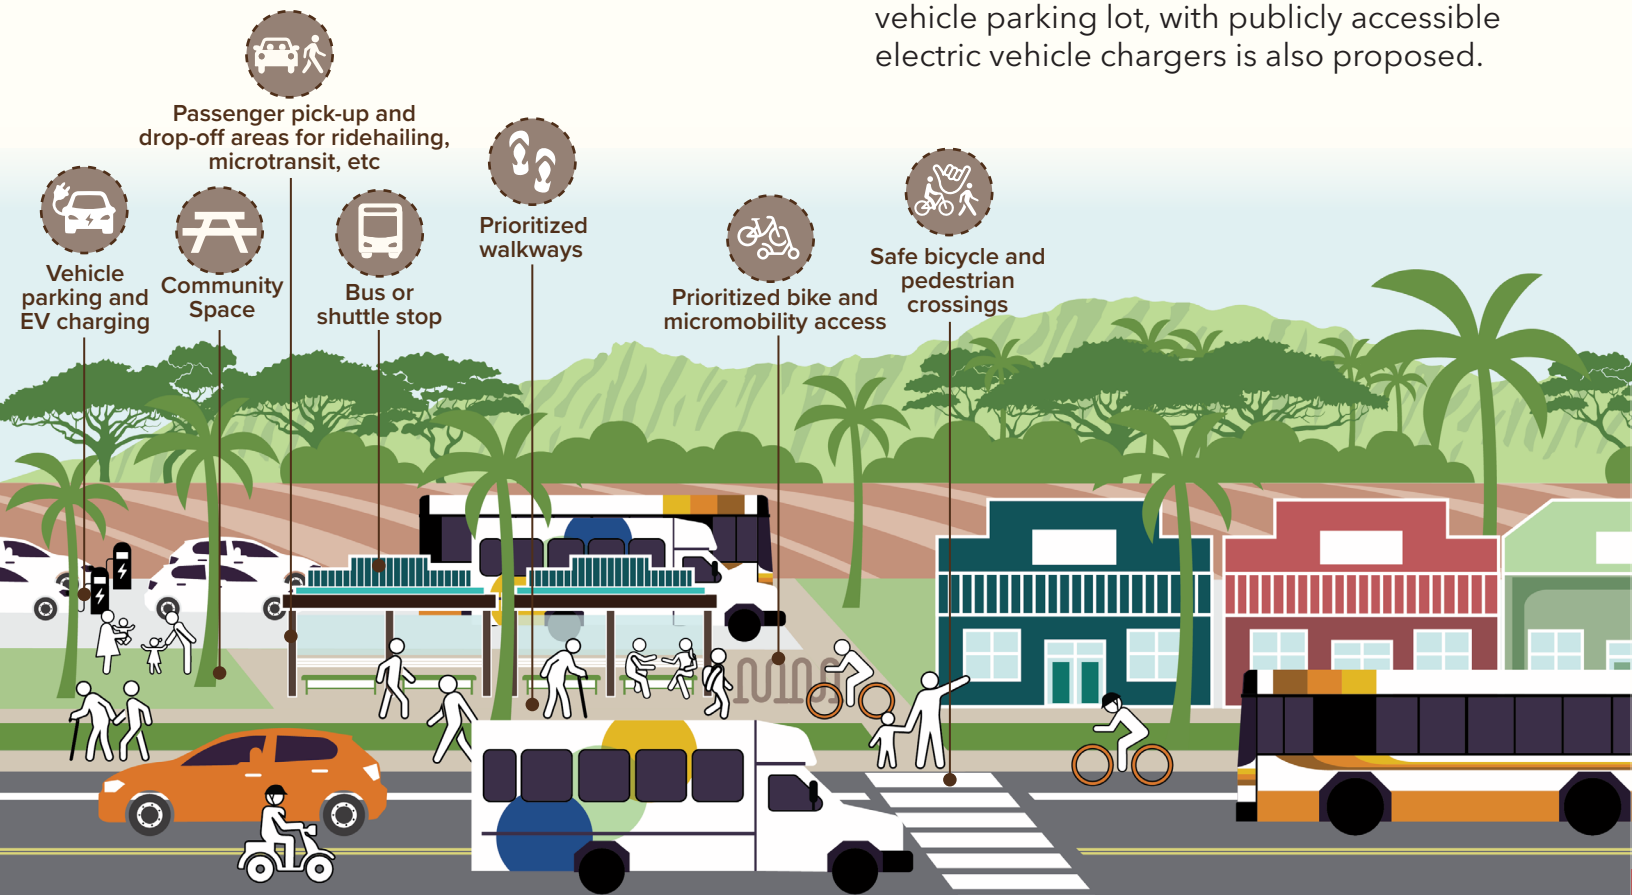

The City and County of Honolulu is proposing to implement mobility hubs across O'ahu where each hub will reflect the unique community that surrounds it. This means that a mobility hub in Hale'iwa should look different from a mobility hub in Kapahulu, or Pearl City, while also providing the level of service desired by the community.

What could a Hale'iwa Mobility Hub include?

The proposed Hale'iwa Mobility Hub is projected to have two functions:

➔ First, the hub is proposed to provide a bus transit center for routes serving the North Shore. Bus charging stations will be provided to support the City's transition to a fully electric fleet. Bicycle and pedestrian access will be provided with potential amenities such as dedicated bicycle parking, bathrooms, and a community gathering space.

➔ The second function is to serve as the terminus for a proposed North Shore Shuttle which would provide regular shuttle service along the North Shore for both locals and tourists. To accompany the terminal station, a vehicle parking lot, with publicly accessible electric vehicle chargers is also proposed.

Site Selection Study

The project team reviewed parcels in Hale'iwa that could support a mobility hub. Parcels were ranked based on a number of factors including access and connectivity, impact from natural hazards, and potential cost to develop. The map below shows the resulting top three sites.

Hale'iwa Mobility Hub Quick Facts

Roughly
6-10 acres

North Shore
Shuttle Terminus

Within ½ mile
of Hale'iwa Town

Bike Parking

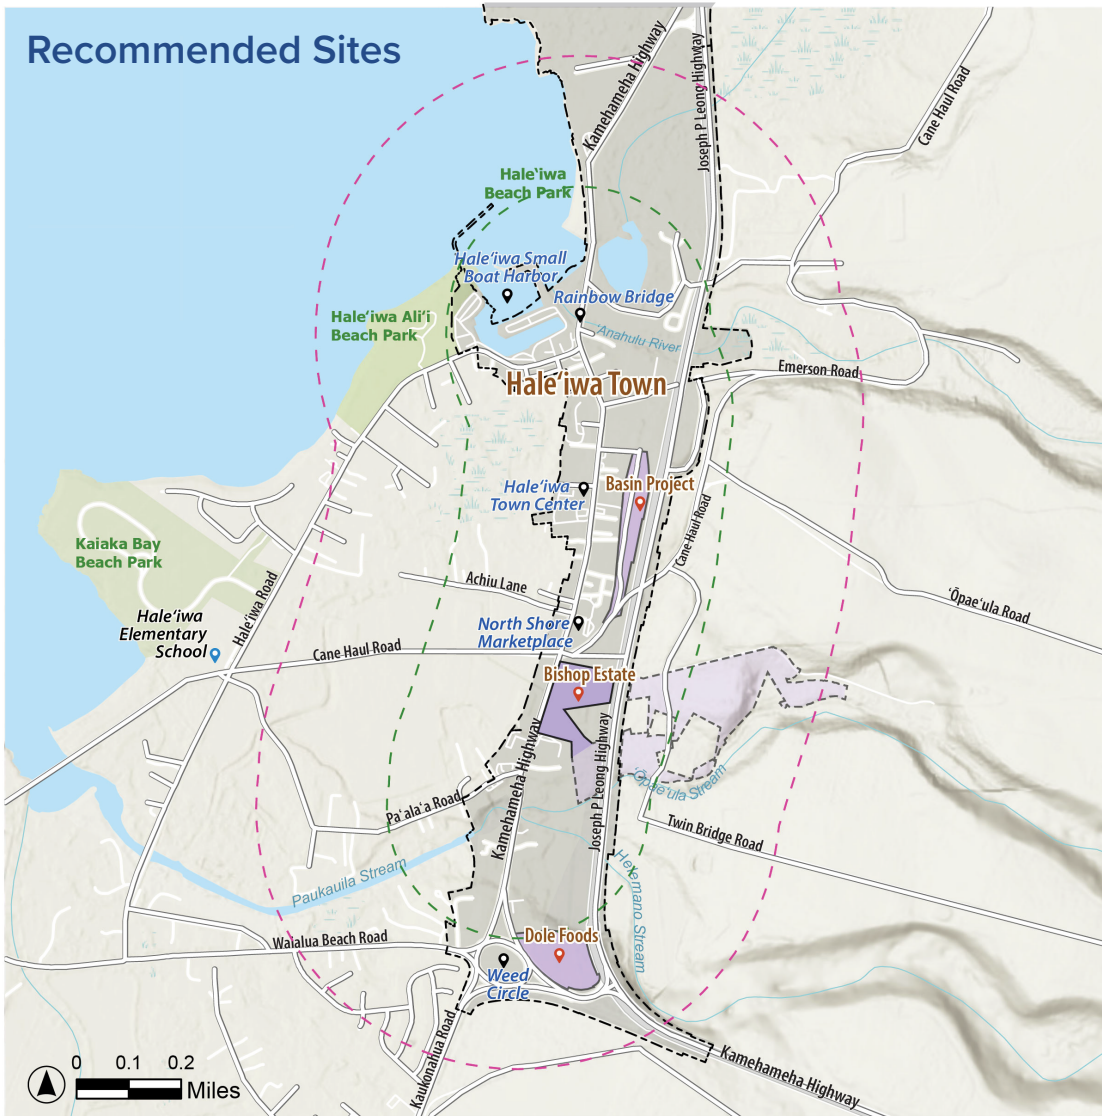

Electric Bus
Charging Stations

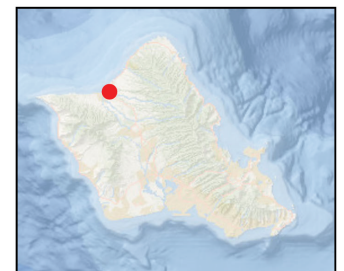

Vehicle Parking &
EV Charging
